ANNEXURE

1. *General.*—Large numbers of ex-soldiers will be required on mobilization, and in smaller numbers on an emergency, to form complete units or to carry out supervisory and disciplinary duties in certain miscellaneous units, or to fill appointments which require previous military experience.

These terms and conditions of service are not applicable to ex-service personnel re-enrolled for duties other than those mentioned above.

All such ex-service personnel, including those required for duty squadrons, companies and platoons, will be enrolled into the Corps with which they are to be employed; e.g.:—

(a) Personnel for a Road Construction Battalion will be enrolled into the Road Construction Corps.

(b) Personnel for duty companies will be enrolled into the regiment to which the duty company belongs.

(c) Personnel for employment with the ordnance service into the Indian Army Ordnance Corps.

3. *Terms of service.*—(a) Ex-Viceroy's commissioned officers will be re-employed in the permanent rank held by them on retirement. They will, however, be employed, with due consideration to their rank and seniority in the duties for which they are considered suitable by the enrolling officer, and will receive the pay and allowances of the appointment held (within the ranks and numbers authorized in the war establishments of their units) as received by the incumbents of similar appointments in permanent units.

A departure, however, may be made from the ranks authorized for particular appointments in the war establishment of a unit, so long as pay remains unaffected, e.g., a subadar may be re-employed as a platoon commander with the pay of a jemadar, when the subadars' appointments in the unit are already filled by more senior ex-subadars.

Ex-Indian non-commissioned officers and men will be re-employed in the rank considered most appropriate to their previous rank and to their qualifications at the time of re-employment.

(b) Promotion in, and to, Viceroy's commissioned, warrant and non-commissioned rank may be made as required to complete establishments of individual units.

(c) Service will be for the period of the war (or emergency) and twelve months thereafter provided that their services are so long required.

(d) Enrolment and attestation will be on Indian Army Form K.-1162. Attestation will be carried out immediately on enrolment.

4. *Pay and allowances.*—Viceroy's commissioned officers and other ranks will be entitled to emoluments as follows :—

(i) pay of rank at Indian infantry rates, but see paragraph (ii) below;

(ii) ex-Viceroy's commissioned officers and other ranks of arms and branches of the service other than infantry, who are employed in units, etc., of their original arm or branch, will receive pay of rank plus corps or technical pay, if any, at the rates applicable to their arm or branch;

(iii) plus pension already earned;

(iv) plus proficiency pay in the case of those ex-service non-commissioned officers and men re-employed as sepoys, sowars or riflemen, who were in receipt of G.S. pay G.C. pay or proficiency pay immediately before discharge. The grant of proficiency pay to others will be regulated under the ordinary rules contained in F. & A. Regulations, Volume I;

(v) on promotion to non-commissioned rank, good service pay under the normal conditions applicable to serving soldiers;

(vi) a non-commissioned officer re-employed as such will draw the same rate of good service pay as he was drawing immediately prior to his discharge.

5. (a) Re-employed service will count as qualifying service for increase of good service pay.

(b) Re-employed service will count as qualifying service for pension in cases where a pension has not been earned already, and the gratuity, if drawn, has been refunded to Government, but in no case will such service be permitted to count towards any increased rate of pension where pension has already been earned.

6. *Rations.*—Free rations while employed as admissible to Indian Army, *vide* Scales of Rations and Supplies issued by the Royal Indian Army Service Corps.

7. *Equipment and Clothing.*—No clothing allowance will be admissible. Clothing and equipment will be issued on the scales laid down in Clothing Regulations* and War Equipment Tables and will remain the property of Government.

8. *General.*—For all other purposes, *e.g.*, leave, accommodation, medical aid, allowances and special pay, field service batta, deferred pay, travelling concessions, etc., ex-service personnel will be treated in the same manner as corresponding ranks of regular regimental units. The names of quarries, kilns, etc., where first-class materials are to be obtained will be given in the Descriptive Specification Sheet. The best class of materials to be obtained from the quarries or other sources defined shall be used on the work. In every case the materials must comply with the relevant standard specification. Samples of materials as called for in the standard specifications, or in the tender, entire, or as required by the Executive Engineer in any case, shall be submitted for the Executive Engineer's approval before the supply to site of work is begun. If the contractor, after examination of the source of materials defined in the Descriptive Specification Sheet, is of opinion that materials complying with the standard or other specifications of the contract cannot be obtained in quality or sufficient quantity from the source defined in the Descriptive Specification Sheet, he shall so state clearly in his tender and state therefrom he intends to obtain materials, subject to the approval of the Executive Engineer.

The Government will not, however, after acceptance of a contract rate pay any extra charges for lead or for any other reason, in case the contractor is found later on to have misjudged the materials available. Attention of the contractor is directed to the standard "Preliminary Specification" regarding payment of seigniorage, tolls, etc.

8. The tenderer's particular attention is drawn to the sections and clauses in the standard "Preliminary Specification" dealing with—

(1) Test, inspection and rejection of defective materials and work.
(2) Carriage
(3) Construction plant.
(4) Water and lighting.
(5) Cleaning up during progress and for delivery.
(6) Accidents.
(7) Delays
(8) Particulars of payment.

The contractor should closely peruse all the specification clauses which govern the rates which he is tendering.

9. A schedule of quantities accompanies this tender notice. It shall be definitely understood that the Government does not accept any responsibility for the correctness or completeness of this schedule, and that this schedule is liable to alterations by omissions, deductions, or additions at the discretion of the Executive Engineer, Salem Division, or as set forth in the conditions of contract. The tenderer will, however, base his lump-sum tender on this schedule of quantities. He should quote specific rates for each item in the schedule, and the rates should be in rupees, annas and in words of three pies. The rates should be written both in words and figures and the units in words. The tenderer should also show the totals of each item and the grand total of the whole contract, and quote in the tender a lump sum for which he will undertake to do the whole work subject to the conditions of contract, such lump sum agreeing with the total amount of Schedule A. This schedule accompanying the lump-sum tender shall be written legibly and free from erasures, overwritings or scoverisions of figures. Corrections, where unavoidable, should be made by crossing out, initialing, dating and rewriting.

10. Tenders offering a percentage deduction from or increase on the estimate amount and those not submitted in proper form or in due time will be rejected. Rates or lump-sum amounts for items not called for shall not be included in the tender. No alteration which is made by the tenderer in the contract form, the conditions of contract, the drawings, specifications, or quantities accompanying same will be recognized; and if any such alterations are made, the tender will be void.

11. The tenderer should work out his own rates, without reference being made to the Public Works Department current schedule of rates or to the Public Works Department estimate rates which are not open for inspection by tenderers.

12. The price at which and the source from which certain particular materials shall be obtained by the contractor are given at the end of the schedule accompanying the tender form. Tenderers must accept the matter at these prices, and shall quote their price for finished work accordingly. Notwithstanding any subsequent change in the market value for these materials, the charge to the contractor will remain as originally entered in the written contract. No cartage or incidental charges will be borne by Government in connexion with this supply.

13. The attention of the tenderer is directed to the contract requirements as to the time of beginning work, the rate of progress, and the dates for the completion of the whole work and its several parts. The following rate of progress and proportionate value of work done from time to time, as will be indicated by the Executive Engineer's certificate of the value of work done, will be required. Date of commencement of this programme will be the date on which the site (or portion) is handed over to the contractor.

Period after date of commencement.	Percentage of work completed (based on contract lump-sum amount).
	Not over.
Three months	15
Six months ..	40
Nine months ..	60
Twelve months ..	80
Fifteen months ..	100

Note.—The periods to be entered in column 1 for the purpose of defining the rate of progress may be fixed by the Executive Engineer to suit each case.

14. No part of the contract shall be sub-let without written permission of the Executive Engineer nor shall transfer be made by power-of-attorney authorising others to receive payment on the contractor's behalf.

15. If further necessary information is required, the Executive Engineer of the Division will furnish such, but it must be clearly understood that tenders must be received in order, and according to instructions.

16. The Executive Engineer or other sanctioning authority reserves the right to reject any tender or all the tenders without assigning any reason therefor.

17. Preference in the selection from among the tenderers will be given, other things being equal, to those who are themselves professionally qualified or who undertake to employ qualified men at their cost to look after the work. The tenderers should therefore state in clear terms whether they are professionally qualified or whether they undertake to employ technical staff and if so to give their professional qualifications or of the staff to be employed. In case the selected tenderer is one who has undertaken to employ technical staff under him, he should see that one of the staff is always at site of the work during working hours, personally checking all items of work and paying extra attention to such works as may demand special attention (e.g.). Reinforced concrete work, etc.

18. Wherever possible, only materials manufactured in India should be used.

If the tender is made by an individual, it shall be signed with his full name and his address shall be given. If it is made by a firm, it shall be signed with the co-partnership name by a member of the firm, who shall also sign his own name, and the name and address of each member of the firm shall be given. If the tender is made by a corporation, it shall be signed by a duly authorized officer who shall produce with his tender, satisfactory evidence of his authorization. Such tendering corporation may be required, before the contract is executed, to furnish evidence of its corporate existence.

3. Each tenderer must pay, as earnest money, a sum of Rs 250 into the branch of the Imperial Bank of India or into the Government treasury or sub-treasury within the jurisdiction of the Executive Engineer concerned to the credit of revenue deposits on behalf of the Executive Engineer of the Salem Division and enclose with his tender the chalan endorsed accordingly This earnest money will be refunded to the unsuccessful tenderer on application, after intimation is sent of rejection of the tender or at the expiration of two months from date of tender, whichever is earlier. This refund will be authorized by the Executive Engineer by suitable endorsement on the chalan. The earnest money will not be received in cash or currency notes by the Public Works Department Officers, save in exceptional cases, where there are no treasuries or banks within the jurisdiction of the officer calling for tenders. When currency notes are given, the tenderer should sign his name in full with date, on the back of all the currency notes given by him, whatever their denominations may be.

The earnest money will be retained in the case of the successful tenderer and will not carry any interest. It will be dealt with as provided in the tender.

4. When a tender is to be accepted, the tenderer whose tender is under consideration shall attend the Executive Engineer's office on the date fixed by written intimation to him. He shall forthwith upon intimation being given to him by the Executive Engineer of acceptance of his tender make a security deposit of Rs. 330 in one of the forms prescribed in the Madras Public Works Account Code and sign an agreement in the proper departmental form for the due fulfilment of the contract. This security deposit together with the earnest money and the amount withheld according to clause 68 of the Standard Preliminary Specification of the Madras Data for Standard Specifications shall be retained as security for the due fulfilment of the contract. If a cash security deposit is made by the contractor he shall follow the procedure laid down in the preceding paragraph for payment of earnest money and such deposit will not bear interest. Failure to attend the Executive Engineer's office on the date fixed in the written intimation from such office or to enter into the required agreement or to make the security deposit as

defined in this paragraph shall entail forfeiture of the earnest money. The written agreement to be entered into between the contractor and the Government shall be the foundation of the rights of both the parties and the contract shall not be deemed to be complete until the agreement has first been signed by the contractor and then by the proper officer authorised to enter into contracts on behalf of Government.

5. The tenderer shall examine closely, the Madras Detailed Standard Specifications, and also the Standard Preliminary Specification contained therein, and sign the Divisional office copy of the Madras Detailed Standard Specifications and its addenda volume in token of such study before submitting his tender unit rates which shall be for finished work *in situ*. He shall also carefully study the drawings and additional specifications and all the documents which form part of the agreement to be entered into by the accepted tenderer. The Madras Detailed Standard Specifications and other documents connected with the contract such as specifications, plans, descriptive specification sheet regarding materials, etc., can be seen at any time between 11 a.m. and 5 p.m. on office days, in the office of the Executive Engineer, Salem Division. A copy of the set of contract documents can also be had on payment of Rs. 3 for each set.

6. The tenderer's attention is directed to the requirements for materials under the clause "Materials and workmanship" in the "Preliminary Specification." Materials conforming to the British Standard Specifications shall be used on the work, and the tenderer shall quote his rates accordingly.

7. Every tenderer is expected, before quoting his rates, to inspect the site of the proposed work. He should also inspect the quarries, and satisfy himself about the quality and availability of materials. The names of quarries, kilns, etc., wherefrom certain materials are to be obtained will be given in the Descriptive Specification Sheet. The best class of materials to be obtained from the quarries or other source defined shall be used on the work. In every case the materials must comply with the relevant standard specification. Samples of materials as called for in the standard specifications, or in this tender notice, or as required by the Executive Engineer in any case, shall be submitted for the Executive Engineer's approval before the supply to site of work is begun. If the contractor, after examination of the source of materials defined in the Descriptive Specification Sheet, is of opinion that materials complying with the standard or other specifications of the contract cannot be obtained in quality or sufficient quantity from the source defined in the Descriptive Specification Sheet, he shall so state clearly in his tender and state wherefrom he intends to obtain materials, subject to the approval of the Executive Engineer.

The Government will not, however, after acceptance of a contract rate pay any extra charge for lead or for any other reason, in case the contractor is found later on to have misjudged the materials available. Attention of the contractor is directed to the standard "Preliminary Specification" regarding payment of seigniorage, tolls, etc.

8. The tenderer's particular attention is drawn to the sections and clauses in the standard "Preliminary Specification" dealing with—

(1) Test, inspection and rejection of defective materials and work
(2) Carriage.
(3) Construction plant.
(4) Water and lighting.
(5) Cleaning up during progress and for delivery.
(6) Accidents.
(7) Delays.
(8) Particulars of payment.

The contractor should closely peruse all the specification clauses which govern the rates which he is tendering.

9. A schedule of quantities accompanies this tender notice. It shall be distinctly understood that the Government does not accept any responsibility for the correctness or completeness of this schedule, and that this schedule is liable to alterations by omissions, deductions, or additions at the discretion of the Executive Engineer, Salem division, or as set forth in the conditions of contract. The tenderer will, however, base his lump-sum tender on this schedule of quantities. He should quote specific rates for each item in the schedule, and the rates should be in rupees, annas and in words of three pies. The rates should be written both in words and figures and the units in words. The tenderer should also show the totals of each item and the grand total of the whole contract, and quote in the tender a lump sum for which he will undertake to do the whole work subject to the conditions of contract, such lump sum agreeing with the total amount of Schedule A. This schedule accompanying the lump sum tender shall be written legibly and free from erasures, overwritings or corrections of figures. Corrections, where unavoidable, should be made by crossing out, initialling, dating and rewriting.

10. Tenders offering a percentage deduction from or increase on the schedule amount and those not submitted in proper form or in due time will be rejected. Rates or lump sum amounts for items not called for shall not be included in the tender. No alteration which is made by the tenderer in the contract form, the conditions of contract, the drawings, specifications, or quantities accompanying same will be recognised; and if any such alterations are made, the tender will be void.

11. The tenderer should work out his own rates, without reference being made to the Public Works Department current schedule of rates or to the Public Works Department estimate rates which are not open for inspection by tenderers.

12. The price at which and the source from which certain particular materials shall be obtained by the contractor are given at the end of the schedule accompanying the tender form. Tenderers must accept the material at these prices, and shall quote their price for finished work accordingly. Notwithstanding any subsequent change in the market value for these materials, the charge to the contractor will remain as originally entered in the written contract. No cartage or incidental charges will be borne by Government in connexion with this supply.

13. The attention of the tenderers is directed to the contract requirements as to the time of beginning work, the rate of progress and the dates for the completion of the whole work and its several parts. The following rate of progress and proportionate value of work done from time to time, as will be indicated by the Executive Engineer's certificates of the value of work done, will be required. Date of commencement of the programme will be the date on which the site (or premises) is handed over to the contractor:

Period after date of commencement.	Percentage of work executed (based on contract lump-sum amount).
(1)	(2)
Three months ..	20 per cent.
Six months ..	50 "
Nine months ..	75 "
Twelve months ..	100 "

Note.—The periods to be entered in column (1) for the purpose of defining the rate of progress may be fixed by the Executive Engineer to suit each case.

14. No part of the contract shall be sublet without written permission of the Executive Engineer nor shall transfer be made by power-of-attorney authorizing others to receive payment on the contractor's behalf.

15. If further necessary information is required, the Executive Engineer of the division will furnish such, but it must be clearly understood that tenders must be received in order, and according to instructions.

16. The Executive Engineer or other sanctioning authority reserves the right to reject any tender or all the tenders without assigning any reason therefor.

17. Preference in the selection from among the tenderers will be given, other things being equal, to those who are themselves professionally qualified or who undertake to employ qualified men of their caste to look after the work. The tenderers should therefore state in clear terms whether they are professionally qualified or whether they undertake to employ technical staff and if so to give their professional qualifications or of the staff to be employed. In case the selected tenderer is one who has undertaken to employ technical staff under him, he should see that one of the staff is always at site of the work during working hours, personally checking all items of work and paying extra attention to such works as may demand special attention, e.g., reinforced concrete work, etc.

18. Wherever possible, only materials manufactured in India should be used.
